

How to transfer your Domain Name to us?

Written by Paul.F

.org.uk / .me.uk / .co.uk

If your domain name TLD ends with the following:- [.org.uk](#) / [.me.uk](#) / [.co.uk](#) , we first require you to change your ISPTAG to: ‘

Tucows-CA

’ and then please submit a

[support ticket](#)

detailing the same. Once we have received your ticket we will initiate the transfer which will complete the move.

.com / .org / .net /

If your domain name TLD end with the following:- [.com](#) / [.org](#) / [.net](#) we would invite you to first submit a

[support](#)

[ticket](#)

requesting the transfer.

After you have submitted a [support ticket](#) a member of our team will log into our system and initiate the move. An email will be generated and sent to the domain’s administrator email address, asking for an authentication code which is obtained from the company which manages your domain. Once confirmed the domain will be transferred in to Joomla Wired’s control where upon we will change then Name Server records to point to our servers, this will complete the transfer.

International Domains

If you would like us to manage international domains as part of your hosting plan the simplest thing to do is drop your requirements in a [support ticket](#) , with a little assistance we will make the transition as smooth as possible.
